SILENT400M

34 liters completely silent mirror mini-bar

The SILENT400M mini bar is simultaneously silent, ecological and spacious with its 34 liters capacity.

Technical specifications ...

EAN code: 5420046412110

Installation mode: Free standing and build-in

Reversible door: Yes

Energy class: A+

New energy class: F

Cold type: Static

Cold generator module: Thermoelectric semi-conductor

Lighting: LED

Color: black mirror

Door type: Foam

Net total volume (liter): 35l

Refrigerator defrosting: Automatic

Shelves number: 1

Power: 63W

key lock:

Airborne acoustical noise emission class: A

Energy consumption (year): 96kWh/an

Climatic class: N/SN

Gross dimensions (HxLxD) in cm: 61x45.5x48

product dimensions (HxLxD) in cm: 57x40x43

Brutto weight (kg): 15kg

Net weight (kg): 14kg

Quantity per container: 500

Brand: Brandy Best

Standards: CE - ROHS - REACH

A fresh casket for your drinks...

With its large capacity, this mini bar allows you to keep fresh your bottles of all sizes. Totally silent thanks to its Peltier effect with a cool semi conductor module, the mini bar is an innovative technology, providing a low energy consumption and a silent working. Its glossy finition gives it a resolutely modern look. You will enjoy it in your bedroom, your study or in your leaving room. For 36 cans + 8 small cans.

Silence and space...

Airborne acoustical noise emission class "A", totally silent Peltier effect We obtain this result by optimising the electronic regulation, and thanks to the cold exchanger concieved in aluminium, and being full part of the minibar's cavity. Based on the Peltier effect, innovative technology also called thermoelectric, a physical phenomenon of heat movement with and electric current. The effect takes place in the different nature materials of high conductivity linked together by junctions. One of the junction gets cold when the other one gets hot. The cold produced is collected inside the minibar, and the heat is evacuated thanks to a radiator located at the back of the minibar. Today, this technology is only used for minibars.
